PROFILE

iOS Developer with 3 months of industrial experience. I am developing mobile applications in this operating system and iPadOS since 2018. Have a good amount of knowledge in Swift Programming and Swift-UI. Developed more than 25 mobile applications. Also developed mobile applications with some advanced technology such as Machine Learning and AR (Augmented reality). Set a bunch of applications in AR while learning the concepts of AR.

EXPERIENCE

iOS Developer Intern, Coronation Solutions PVT LTD, Ahmedabad, India — September-2020 - December 2020

I completed 3 month Internship as an iOS developer in Coronation Solutions Private Limited. During the internship learned core fundamental of Swift programming language. Developed an E-Commerce mobile application during the internship.

Crew Member, McDonald's , London, UK — September-2022 - Present

I am serving as a crew member in McDonald's, Neasden branch. McDonald's assigned me Cash (Till) Counter and customer representative. In this role, I have been dealing with many customers to take their orders, provide them services and solve their issues. During this job, I gain knowledge about customer dealing and advisory.

PROJECTS

Blood Spot — Graduation Year Project

Blood spot is an online blood / plasma donation website that was developed by me and my teammates as our final year graduation project.

I guided my team as a leader and decided the content of the project. I managed all the paperwork such as presentation and reports.

Mobile Application Development — Personalise Project

Developed iOS applications that are based on swift and swift UI programming languages. While I was learning iOS 11 and iOS 13 I developed these mobile application.

Augmented Reality & 3-D Object Animation — Personalised Project

Developed mobile application in iOS platform with advance technology such as Machine Learning and Augmented Reality. Also create 3-D object with the help of Apple's pre written photogrammetry command line application.

Web Development — Personalised Project

Developed my own iOS developer portfolio for learning purpose.
